**Drawing a Beetle**

- Draw two circles near the top of your paper.
- Connect the circles (eyes) with a line, then draw a curved rectangle.
- Connect the eyes to a neck. Put your crayon or marker in the middle of the neck and draw a line down as far as you wish.
- Draw the two sets of the body and then add lots of legs.
- Remember, bugs are symmetrical. What you draw on one side, draw on the other.
- Add patterns inside the bug’s body, and anywhere else you wish.
