

Let America Build upon itself

By Samuel Sean Patterson

Let America refine its education system to give all a possibility of success.

Let it be the land of second chances

Let it be the immigrant's dream,

Seeking a new future to build on.

(America the imaginary place of possibilities, equality and absolute freedom)

Let America be the dream the dreamers dreamed

Let it be that alluring place it was sought to be with second chances,

freedom and magnificent landscapes

Where everyone has their own place, healthcare and the ability to build on their future.

(It never has been the full American dream, there has always been difficulties)

O, let my land be land where all can find a place to call home.

Is crowned by no king or dictator

Is controlled by the people who elect their own leaders.

(There has never been a king or queen, yet before it was America, it had people who lived off the land and roamed freely)

I am the American boy

I am the kid with a wish

I am the kid looking for opportunity

I am a person with suggestions, not plans

And finding answers for the problems.
